

BELMONDO®
Box plus

New!

The **first-class product** amongst the **BELMONDO® rubber floorings!**

Features

BELMONDO® Box plus is an absolutely first-class product. Modelled on the soft natural ground of a meadow, it provides enhanced comfort when horses are laying down and is better suited to the musculoskeletal system of horses.

Designed exclusively for use in horse stables, the softer Box plus flooring is an extra two millimetres thick and even better adapted to the needs of horses.

The result: even more robust, ductile and anti-slip. As such, this first-class mat prevents hooves from slipping away when horses stand up and renders injuries to hocks and fetlocks almost impossible.

- watertight
- easy to use
- simple to lay without trip hazards
- robust, almost jointless flooring thanks to precision puzzle interconnection (no need for screwing or gluing)
- BELMONDO® Box plus is just as easy to lay as BELMONDO® Classic flooring.

Consult the separate instructions on laying.

Data

Surface:
Horseshoe profile

Underside:
Concave dishes

Material:
Vulcanised rubber

Dimensions (approx.):
Thickness 18 mm
Length 1 m
Width 1 m
Weight per mat 20 kg

Puzzle cut on 4 sides

BELMONDO® Box plus can be combined with all new BELMONDO® products

The underside of the Box plus flooring features a special dish profile: The 50 mm diameter dishes trap cushions of air, thus ensuring optimum insulation against the cold and helping to minimise diseases.

Subject to change without prior notice. All dimensions specified with tolerances: Thickness ± 2 / -1 mm. Length and width ± 1.5 % (DIN ISO 3302-1 tolerance class M 4). The tolerances also apply within the mat.
